

Business Group	Business Unit	Product's name	Product's short description
Environmental Science		Agenda	A unique termiticide for the control of termites, provides structural protection and colony management which contains a non-repellent active ingredient Fipronil with a novel mode of action and exceptional activity against termites at ultra-low doses. It has good residual properties in soil with minimal effects to the environment.
		Aqua K-Othrine	An innovative high performance space spray concentrate is designed for ULV application but with thermal fog capability. There is zero diluents cost and minimal environmental impact. This product was developed as a water-based formulation containing a patented evaporation retardant.
		Aqua Resigen	An ULV insecticide concentrate which is designed as a water-based product containing a patented evaporation retardant.
		Baraki	A ready made bait rodenticide formulated from Difethialone, the first of a new chemical family which retains the well-known mode of action of the anti-coagulant rodenticides (anti-vitamin K activity). It is a single feed anti-coagulant for rodent control.

Business Group	Business Unit	Product's name	Product's short description
Environmental Science		Baycidal	A wettable powder concentrate containing the insect growth regulator Triflumuron, with its' low mammalian toxicity and chitin synthesis inhibition properties have made it to use as additives to usual spray treatment to improve reliability and residual action. It is effective against all larval and nymphal stages with both complete and incomplete metamorphosis.
		Blattanex Gel	The new ready to use gel bait for fast, effective control of cockroaches has been tailor made for professional use.
		Cislin 25 EC	A residual insecticide based upon the most active pyrethroid compound yet discovered (Deltamethrin) for Pest Control Industry.
		Crackdown	A surface spray concentrate for residual activity is based on the extremely potent pyrethroid insecticide Deltamethrin for dilution in water to give an insecticidal surface spray for use in public health and food storage practice giving excellent residual activity against a broad spectrum of crawling and flying insects.
		Deltacide	A thermal fogging insecticide concentrate which is designed for dilution with diesel oil or kerosene.
		Ethoxysulfuron WG	A very effective Sulfonylurea herbicide used in crops against sedges and broad-leaved weeds.

Business Group	Business Unit	Product's name	Product's short description
Environmental Science		K-O Tab	A concentrated tablet (25% Deltamethrin) is designed for treatment of mosquito nets to provide a long lasting repellent and killing effect against mosquitoes, sand flies and other arthropods.
		K-O Tab 1-2-3	An innovative technology, the dip-it-yourself in field treatment kit for mosquito nets providing long lasting wash resistance, according to WHOPES interim recommendation.
		K-Othrine SC	A special aqueous suspension concentrate formulation of micronised Deltamethrin the residual pyrethroid which offers exceptional killing and repellent protection against mosquitoes when used to impregnate bednets.
		K-Othrine WDG	A new residual pyrethroid formulation for malaria control. This product was developed as a water dispersible formulation for application to wall surfaces to give long lasting control against mosquitoes, sand flies and triatomid bugs to control malaria, leishmaniasis, and Chagas disease. It contains Deltamethrin, a highly active pyrethroid insecticide.
		Maxforce Forte	The new ready to use gel bait for fast, effective control of cockroaches has been tailor made for professional use.

Business Group	Business Unit	Product's name	Product's short description
Environmental Science		Maxforce Quantum	A new ready to use liquid gel bait for effectively control of ants & colonies which has been developed for professional use.
		Premise 200 SC	A new generation termiticide with the unique dual mode of action which breaks the concept of termite barrier, provides structural protection and colony management by creating a non-repellent treated zone plus working with nature to kill termites. Its' novel mode of action is exceptional activity against termites at ultra-low doses with having the good residual properties in soil by with minimal effects to the environment.
		pulsFOG	The best thermal fogging sprayer produces from Germany with a patented switching on Pulse Jet.
		Quick Bayt	The new ready to use granular bait for fast, effective control of flies. It is easy to use and suitable for targeted application as scattering or painting.
		Racumin Paste	The new, highly effective, universally applicable, ready to use rat bait with the most advanced from first generation anti-coagulant rodenticide "Coumatetralyl" for the control of rats in houses, buildings, stores, factories, warehouse and farms.

Business Group	Business Unit	Product's name	Product's short description
Environmental Science		Racumin Powder	A unique tracking powder rodenticide for the control of rats provides 2 ways in term of use application, apply directly onto the pathways, entrance of rat hole or use to make a ready bait by mixing with some diet constitutes at the ratio 1:19.
		Racumin Rice Bait	A ready to use rat bait contains an effective anti-coagulant rodenticide “Coumatetralyl” for the control of rats in houses, buildings, stores, factories, warehouse and farms.
		Resigen	A blend of the synthetic pyrethroids Permethrin and S-Bioallethrin plus with the pyrethroid synergist PBO. It is specially formulated for admixture with oil or water and being used as an ULV concentrate.
		Responsar 2.5 SC	A new water-based suspension concentrate insecticide contains beta-Cyfluthrin as a.i. for used to control various flying and crawling insects pest.
		Rovralflo SC	A selective formulation of broad spectrum fungicide against spores and mycelium of a number of parasitic fungi for foliar use and seed treatment in crops.
		Solfac 10 WP	A wetttable powder concentrate containing the residual synthetic pyrethroid Cyfluthrin, with its' low toxicity and long-lasting properties have made it the treatment of choice in insect pest control campaigns.
